Design Artwork in Ceramic Glazed Masonry

Ceramic Glazed Brick and Tile are typically used for structural walls (6" or 8" units) or veneers (2" or 4" units), however, regardless of the function, you can achieve creative art designs. Installed by your local mason in one step using type N or S mortar, these units will give you the wall and finish in each single unit.

Creative art designs are typically crafted by the architect and submitted to Elgin Butler where they are infused into the masonry unit using permanent ceramic pastes and glazes. Once the designs are in place, the units are fired at temperatures greater than 2000°F, which permanently bonds the clay glaze to the clay body of the unit.

The benefits of ceramic glazed clay masonry include:

- Combine colors, textures, sizes, and shapes for a one-of-a-kind look
- Will never fade
- Chemical and impact resistant for high traffic areas
- Impervious surfaces for walls exposed to graffiti
- Cleans with soap and water

When adding creative elements to your next project, consider Ceramic Glazed Masonry. Visit www.elginbutler.com to download the Long Form Specification(s).

Tech Talk

Elgin Butler was proud to be a presenter at the recent Capital District Masonry Institute's 29th Annual seminar in Albany, NY. On September 14, more than 120 architects, engineers and masonry professionals gathered for a day-long seminar. Kathy Gonser, Technical and Training Director, presented at the event. Her discussion entitled "Technical Overview of Ceramic Glazed Brick and Ceramic Structural Glazed Tile" qualified attendees for one learning credit that is Health, Safety and Welfare accredited.

Should your firm or organization be interested in having an Elgin Butler representative attend a firm meeting, please visit www.elginbutler.com/contact.php to register your request.

Ceramic Glazed Masonry Institute DVD Available

The Ceramic Glazed Masonry Institute is offering a 20-minute DVD about the installation and benefits of Ceramic Glazed Masonry. The information is presented from a mason's perspective. Also available in Spanish. To receive your free copy, **please contact us.**
